

THE NEW PAIN THERAPY

→ SWISS DOLORCLAST® METHOD

**NO
PAIN**

IT'S A PAIN →

**DISCOMFORT, ACHES AND PAINS:
NOT TO BE ABLE TO ENJOY LIFE TO
THE FULLEST IS A REAL PAIN -
QUITE LITERALLY.**

**MILLIONS OF PEOPLE SUFFER FROM PAIN.
IF YOU ARE ONE OF THEM, YOU KNOW
WHAT IT MEANS. CHRONIC PAIN OFTEN
BECOMES UNBEARABLE.**

- > Tennis elbow, shoulder pain, painful heel or back pain: chronic pain drains you, it affects the performance of body and mind, takes away the joy of life, and lessens the quality of life.
- > Chronic pain is often caused by inflammation, stiffening, calcification or strain on muscles or tendons.
- > Now there is an outpatient therapy which fights the causes of chronic pain - without the need for injections, medication, or surgery.
- > Extracorporeal Shock Wave Therapy (ESWT) in conjunction with the Swiss DolorClast® method is effective for all musculoskeletal problems - even if other therapies proved ineffective.
- > Don't let your life be ruled by pain.

**„PAIN IS NO LONGER PAIN
WHEN IT IS PAST.“**

(Margaret J. Preston)

PLEASE HELP →

① TENNIS ELBOW

Painful inflammation of the tendon attachment on the lateral elbow

② SHOULDER PAIN WITH OR WITHOUT CALCIFICATION

Painful limitation of shoulder movement

③ GOLFER'S ELBOW

Painful inflammation of the tendon attachment on the medial elbow

④ BURSITIS TROCHANTERICA

Painful periostitis of the hip

⑤ PATELLA TIP SYNDROME

Inflammation of the point of attachment of the patellar ligament

⑥ TIBIAL EDGE SYNDROME

Inflammation of the tibial edge due to excessive strain

⑦ ACHILLODYNIA

Painful irritation of the Achilles tendon

⑧ PAINFUL HEEL

Painful, mostly chronic inflammation of the heel

INFLAMMATION OF THE TENDON ATTACHMENT

Painful inflammation of tendon attachments due to overexertion or improper strain, or due to degenerative processes

ACUPUNCTURE POINTS

Pain therapy through that treatment of acupuncture points

PAINFUL TRIGGER POINTS

Acute and chronic pain in the back, shoulder, neck, etc. due to permanently shortened and thickened muscles

HIGH TECH TO THE RESCUE→

**EXTRACORPOREAL
SHOCK WAVE
THERAPY (ESWT)
SWISS DOLORCLAST®
METHOD -
TOOAY'S ULTIMATE
HEALING METHOD.**

- > Extracorporeal Shock Wave Therapy (ESWT) using the Swiss DolorClast® method produces high-energy shock waves and delivers them to the tissue via the surface of the skin.
- > As a result, the therapy activates self-healing processes where pain occurs. To put it simply: better blood circulation and the formation of new blood vessels results in improved metabolism. This in turn activates cell generation and helps dissolve calcium deposits.
- > The causes of chronic pain may be eliminated even in a short period of time.

- **NO SURGERY, THEREFORE NO RISK**
- **NO MEDICATION, THEREFORE NO SIDE EFFECTS**
- **NO HOSPITAL ADMISSION,
NO COMPLICATIONS**

**THE SWISS DOLORCLAST® METHOD
FIGHTS CAUSE OF THE PAIN.**

FOR FAST RELIEF FROM PAIN →

**MOST PATIENTS FIND CONSIDERABLE
RELIEF FROM PAIN IN JUST EIGHT
TO TEN DAYS FOLLOWING THE FIRST
APPLICATION.**

¹ Patient feedback allows your doctor to locate the pain by palpation or ultrasound.

² Your doctor marks the area intended for Extracorporeal Shock Wave Therapy (ESWT), Swiss DolorClast® method.

³ A gel is applied to optimize the contact between shock wave applicator and treatment zone.

⁴ The handpiece delivers shock waves to the pain area for just a few minutes depending on the application.

→ SIMPLE AND EFFECTIVE

- > As a rule, just one to three sessions at short intervals are sufficient for Extracorporeal Shock Wave Therapy (ESWT) to be effective in conjunction with the Swiss DolorClast® method.
- > Each session lasts no more than a few minutes.
- > Following the treatment, self-healing continues.

**MANY APPLICATIONS,
ONE METHOD**

Tennis/golfer's elbow

Shoulder pain

Trigger points

Bursitis trochanterica

Achillodynia

Painful heel

WHAT ABOUT TRIGGER POINTS? →

YOUR NECK OR SHOULDERS ACHE.
YOU HAVE KNEE PROBLEMS.
YOU SUFFER FROM HEADACHES
OR MIGRAINES.
YOU FEEL DIZZY.

→ TRIGGER POINTS MIGHT JUST
BE THE CAUSE.

Pain travels up from the upper neck muscles

Pain spreads along the central back muscles

- > Also called myogeloses, trigger points refer to fibrous areas in the muscle that are permanently shortened or thickened.
- > What causes trigger points most often are poor body posture or improper strain.
- > Overexertion or improper strain may adversely affect muscles as well as cartilage, bones and tendons. Painful trigger points are the result.
- > Trigger points may cause pain in places far away from the root of the problem.
- > Today's Swiss DolorClast® method is particularly gentle and effective for the treatment of trigger points without the risk of nerve injury due to injection or similar procedures.

**SWISS DOLORCLAST® -
TODAY'S METHOD
FOR TREATING TRIGGER POINTS.**

FINALLY→

THE SOOTHING EFFECT OF
EXTRACORPOREAL SHOCK WAVE THERAPY
(ESWT) IN CONJUNCTION WITH THE
SWISS DOLORCLAST® METHOD BECOMES
NOTICEABLE IN JUST A FEW DAYS.

> ESWT is used successfully in professional sports and in orthopaedic practice. Its effectiveness has been demonstrated in a multitude of clinical studies.

**PERHAPS YOU TOO WILL BEGIN TO
ENJOY A QUALITY OF LIFE YOU
THOUGHT YOU WOULD NEVER HAVE
AGAIN – LIFE WITHOUT PAIN!**
